

Team:	What are the key assumptions you have identified? (List at least 3)
Model 1	<ul style="list-style-type: none"><li>- Can we analyze in real time the gait pattern of walkers users and generate in time a proper balance answer?</li> <li>- Is the reduction of falls and injuries big enough to justify the creation of a device like ours?</li> <li>- Are the users going to want to change their actual device for ours?</li> <li>- Are we going to have enough money to keep developing the product before going bankrupt?</li></ul>
