

IDEA2 Global Assumptions, hypotheses and key questions

Name:	John Priatel
Team:	ME Therapeutics
What are the key assumptions you have identified? (List at least 3)	<ol style="list-style-type: none">1. Do anti-G-CSF antibodies improve anti-tumour responses (Will they show efficacy in combination with checkpoint inhibitors)?2. Will our humanized anti-human G-CSF antibody work similarly as the surrogate mouse anti-GSF antibody in rodent tumour models?3. Will our anti- G-CSF antibody be safe (non-toxic)?
List experts, users, anti-users, customers, buyers, tech-people, recipients of technology, marketing...	<ol style="list-style-type: none">1. Clinical oncologists2. Cancer immunotherapy scientists3. Venture capital investors
