|---------|---|
| Team: | What are the key assumptions you have identified? (List at least 3) |
| Overjet | <ul style="list-style-type: none">-At 20k images we will be beat dentists at the most common diseases based on our previous results -Dentists will pay for the software because they pay for consultants -Substantial value will be unlocked by analyzing the underlying data -People will pay for Quality assurance based on one DSO that they hire for quality assurance, does that extend across all DSOs -The software will be used everyday by the staff -Dentists will not get annoyed by the software telling them what to do -We can get pretty far without getting FDA |
