

Team:	What are the key assumptions you have identified? (List at least 3)
aquaticDNA	<p>1.- If I have a good product (a very sensitive, non-invasive, fast service), I'm going to have a lot of clients</p> <p>2.- Just because the method we use have advantages compared with traditional methods, clients would like to change their methodology to the new one.</p> <p>3.- As it is explained in my website, my clients would know that we are now doing environmental genetics.</p> <p>4- Now we have not competitors in the spanish market so, we assume that it would take time for them to appear.</p>
