

# Fast T4

*Detecting T4 for you and your baby's health*

A practical solution for the measurement of low T4 levels in pregnant women to prevent potential cognitive impairment in the baby

**Do you know that a low T4 levels during early pregnancy could be harmful for you and your baby?**

**By the time a pregnant woman is diagnosed it is too late**

# Solution

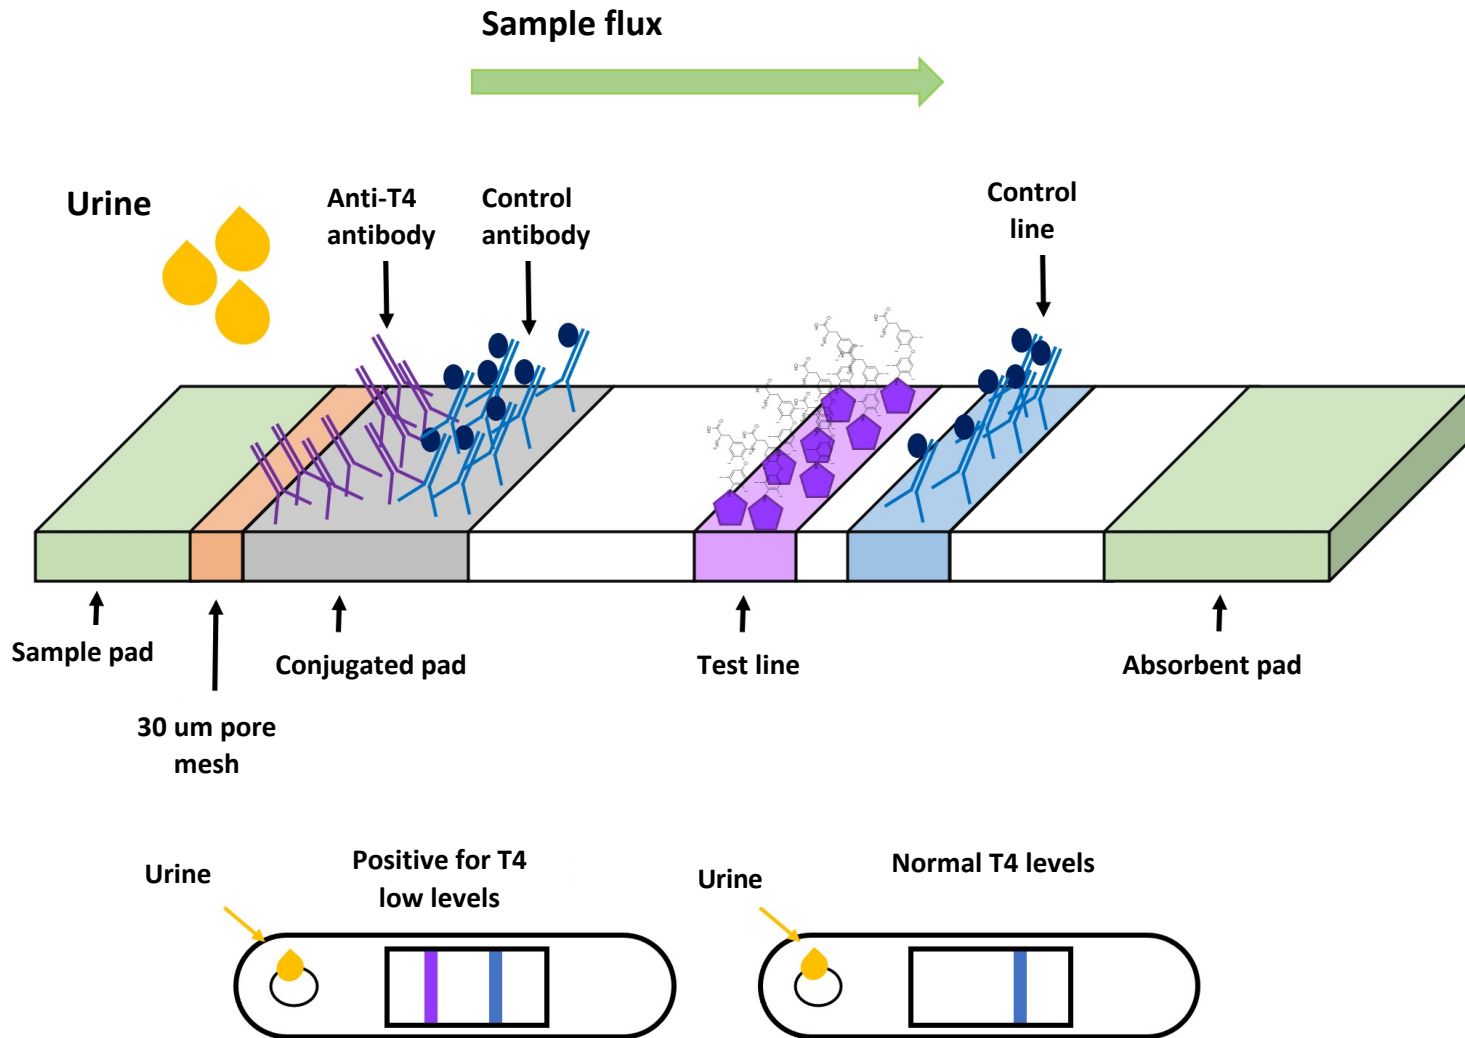

- Thyroid function fluctuates month to month in pregnancy.
- With a home device you can monitor thyroid function every month to detect low levels of T4.
- All you need is a urine sample and the device.
- This is solvable problem because pregnant women can be treated with T4

## Fast T4

Detecting T4 for you and your baby's health

# Our product: Fast T4

Fast T4, a rapid and sensitive home test to identify women who have T4 levels below the required limit.

Easy to use, works like a pregnancy test accurately detecting low levels of T4 in urine samples.

Early detection prevent T4-related health problems for you and your baby.

# Assumptions

211 million of pregnancies worldwide

Home pregnancy test average cost: **USD\$200**

Our potential sales are **USD\$42 billion** per year

# ADHD Cost

2,2 to 9,9% of individuals between 0-17 years old have ADHD diagnosis.

5,000,000 of ADHD diagnosed kids

Educational cost of the ADHD individuals is \$5,007

**USD\$ 25 billion /year**
